*"Always there when you need us"*

And its Participating Wholesale Utility Customers

February 5, 2009

# **Variable Frequency Drive Incentive Program**

## **Program Guidelines**

Available to industrial and large commercial customers of Nebraska Public Power District and its wholesale utilities' customers

Program is not available to customers who qualify for the Irrigation Incentive Program

Application must be completed to receive an incentive

Application must be accompanied by proof of purchase that itemizes the new equipment indicating the type, make, model, size, and purchase date

Program is limited to drives from 1 to 200 horsepower

The equipment must operate at a minimum of 2000 hours annually

Incentives will not be offered to replace existing VFD's or for single phase service. The system controlled must have significant load diversity that will result in savings through motor speed variation. VFD speed must be automatically controlled. VFD must control centrifugal fans or pumps. It is highly recommended to install protective equipment to maintain VFD reliability.

Incentives exceeding \$5,000 require approval by the electric utility before purchase or installation

Program is subject to the Terms and Conditions as outlined on the application
